

Grids

1 contour and 3/4 flat grids between the glass or 7/8 and 1-1/4 externally applied simulated divided lite (SDL) muntins are available in all 8400/140 series windows.

Glazing

Glazing options include Low-E High Performance Glass, tinted or obscure glass, tempered glass and argon gas.

Colors

8400 & 140 Series are available in white and tan.

Screens

Half screens in the 8400 series and full screens in the 140 series with fiber mesh and color coordinated aluminum frames are standard.

Mullions

All 8400/140 series vinyl windows can be factory mullioned together into multiple units.

DIVIDED LITE OPTION (SDL)

We designed our vinyl window line to accommodate the appeal of an authentic divided lite window. Our SDL system's architectural appeal gives the visual effect of a True Divided Lite window without the long term maintenance and seal failure problems attributed to them. The SDLs are applied using 3M double sided tape warranted against color or adhesion failure. They are available in both 7/8 and 1 1/4 widths for the versatility of most architectural styles and are identical to the SDLs used on wood windows.

Time tested, Maintenance-free block & tackle balances

Designed for years of trouble free operation and *never need adjustment.*
